Sequence 4281, Application US/09949016

Sequence 4281, Application US/09949016

Patent No. 6812339

GENERAL INFORMATION:
APPLICANT: VENTER, J. Craig et al.
TITLE OF INVENTION: POLYMORPHISMS IN KNOWN GENES ASSOCIATED
TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS OF DETECTION AND USES THEREOF;
FILE REPERENCE: CLOOL307

CURRENT PPLICATION NUMBER: US/09/949,016

CURRENT FILING DATE: 2000-04-14

PRIOR FILING DATE: 2000-10-20

PRIOR FILING DATE: 2000-10-03

PRIOR FILING DATE: 2000-10-03

PRIOR FILING DATE: 2000-09-08

NUMBER OF SEQ ID NOS: 207012

SOFFMARE: FastSEQ for Windows Version 4.0

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 2072, Application US/09134000C

Patent No. 6617156

GENERAL INFORMATION:

APPLICANT: Lynn Doucette-Stamm et al

TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO

TITLE OF INVENTION: ENTEROCOCCUS FAECALIS FOR DIAGNOSTICS AND THERAPEUTICS

FILE REFERENCE: 032796-032
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   96 ValAsnSerThrIleLysGluLeuArgArgLeuPheLeuValAspAspLeuValAspSer 115
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       116 LeulysPheAlaValLeuMetTrpValPheThrTyrValGlyAlaLeuPheAsnGlyLeu 135

; Sequence 1, Application US/09762724
; Patent No. 6664053
; GENERAL INFORMATION:
    APPLICANT: KOVACS, et al.
; TITLE OF INVENTION: Identification of a region of the major surface
; TITLE OF INVENTION: 191vcpprotein (MSG) gene of human Pneumocystis carinii
FILE REPERENCE: 4239-58054
; CURRENT APPLICATION NUMBER: US/09/762,724
; CURRENT FILING DATE: 2001-02-09
; PRIOR APPLICATION NUMBER: PCT/US99/18750
; PRIOR PELLING DATE: 1999-08-17
; PRIOR FILING DATE: 1999-08-17
; PRIOR FILING DATE: 1999-08-17
; NUMBER OF SEQ ID NOS: 26
; SOSTWARE: Patentin Ver. 2.0
